

I have very good memories about how the children danced and sang at the welcome concert. I also liked the way how the project teams worked together. We discussed very important things connected with school- parents and students and we found good answers for all the questions.

Especially I'm very happy about the opportunity to meet my good friend Dan and new friends from Turkey. These three days were just great! We worked a lot and enjoyed the time together.

Anar Pajula. 16

I think it's really exciting and interesting to hear other students' opinions. I also hope that it will inspire me. The most exciting thing about that project is the people are from different countries and share opinions And of course I can make new friends, too.

The first day was a little bit boring because I was tired and in my own world. The coolest thing was when the Romanian and Turkish boys came to our lessons. I think the boys are really cool and intelligent.

Gerttu Kimberg 15

I had very good time in the project. When we watched the Romanian and Turkish presentations about their countries I realised that Estonia isn't the only beautiful country in the world. I really loved to see Turkish architecture and Romanian nature and castles. I am very happy to make new friends from Turkey and Romania. One thing is amazing too, how great Turkish and Romanian boys are at math. I really enjoyed that project because it makes us think about the problems we don't pay attention every day but which are so important for our everyday life and future. I'm looking forward to going to Romania.

Juhan Taalik 15

I think these two days were very interesting. Yesterday the concert was beautiful. In the evening we went to a disco. It was very cool.

Today we had lots of fun when we discussed the problems about school and family. Our new friend from Turkey and Romania are so friendly and nice. This is project is very useful because it's connected with our real life.

Keterin Kahl 13

I like this project because it's very good to discuss problems together. Everybody is very kind and friendly. The first day was a little bit boring because I didn't understand everything – new voices, different vocabulary. It took me some time to get accustomed to new speakers but I really enjoyed our team work next day. I like that we can meet people from abroad. The concert and disco were also great.

Lisette Pajula 13

The most interesting thing was when I first met the boys from Romania and Turkey. They were very friendly.

The second day was really great and hardworking. I liked working in a group and I hope the results will be good and useful for us, our school and parents. The disco was fun and great. I hope the boys had great days with us. Sometimes we didn't understand each other but anyway we managed to discuss all the problems with body language and smiles.

Marian Mäeots 14

In my opinion this project is very important and interesting because I saw how it is in our family. I liked very much flying by plane because it was the first time for me and I was very emotional because I was a bit scared. I'm making very many friends here. Kaiu School is very beautiful and the teachers are very friendly with the students. I liked very much the concert because I saw the folkdance tradition in Estonia. I want to stay here because the life is very interesting here.

Dan Facer
Romanian team.

In my opinion this project is very important. This project is very useful and interesting. I came from Turkey and I saw very different places, different people and different culture. Here are the people, the culture and the buildings very different. I've spent a lot of time with friendly people in here. I love Estonia, Estonian people and meals. The organization is very good. Thanks a lot everybody.

Feyyez Selvi 16 Turkish Team

I really love this project. When our guests came, there was a little welcome concert. I liked it because I was one of the performers there. Our group work was very exciting and funny sometimes. It's good that we can develop our English here.

I think the Turkish and Romanian students are very friendly. One big plus is we get new friend here. And I think today is more interesting than yesterday. Our group work is better and more efficient than yesterday. It's a great project!

Merily Viiron 14

I liked the project because it's a great way to meet new friends and it's nice to have friends from other countries. I liked the disco as well and the project is very helpful for our future. It makes us think in more mature way.

Siim Asperk 16

I am very happy to be here. This organisation is very interesting and nice. I would stay here. Estonian people are very friendly. My host mother and host father are very hospitable.

Mustafa Oran 16 Turkish team.

I think that yesterday when we were in class we changed ideas and discussed the main problems between students, parents and teachers. But the meeting was a little bit boring. Today when we did group work it was so interesting. Turkish boys are very friendly but at the disco one Turkish boy danced and was very socialised but the another one was a little bit shy. The Romanian boy is very friendly, too. The disco was great but it's very sad they went home very early.

Silje Vokksepp 14

I think this project is interesting and useful. These two days have been different and hardworking. I have enjoyed the activities very much. People came here from Romania and Turkey. I'm happy to meet people from other countries. The first day started with a little welcome concert. After that we discussed project topics with all group. Last night we had a disco, it was great. I liked most to see new places and traditions about Romania and Turkey

when we watched the presentations. I would really like to spend more time with our new friends.

Silva Jõessar 15

I really liked the past days because in our school there have never been Turkish and Romanian people. It is really good to meet people from different countries. I hope they like it too. I liked the concert because I like to sing. The boys from Turkey and Romania were very kind. I hope the boys will have good time in Estonia. I hope the project will be successful because these are problems so close to us.

Ülle Savi 14

I think that this project is very interesting and good. I think that yesterday wasn't so funny as today. We didn't do anything great. But today we speak each other a lot. Today I enjoyed the teamwork. Turkish and Romanian boys and their teachers are very friendly and I like them. I like all the project, because we can speak a lot of English, discuss important problems and make new friends.

Sandra Linaste 13

I think this meeting was very exciting. It was so fun and nice to meet students from other countries. I just liked it very much!! The Turkish boys were so nice and pleasant. They were a bit shy but that wasn't a problem. The Romanian boy was nice and pleasant too. The first day was very strange because we just met and we didn't know what to talk or what to do. On the first day we had sessions and I liked them very much. At night we had a disco. It was cool. I really enjoyed it. But the Turkish boys didn't want to dance, it made me feel sad. On the second day we did hard work. We had to write our opinion and ideas.

For the end, I really liked to participate in this project. I liked the team work and I liked talking to those people and sharing ideas.

Terje Vandmann 15

I like this experience, because I can meet new people and I can speak and learn more English. It's acute important to talk about family relationships. Family must get more information about their children's school and support them. I also like it because it's very interesting to find out new things about Turkey and Romania and it is very nice to find out how friendly and nice these people are.

Liis Lillestik 15

I think the project is very interesting and fun. First I like the fact that we can learn more about Turkish and Rumanian people, their culture and traditions. It is really great that we have guests from other countries in our school. All the students definitely liked the disco on the first day and working in groups and discussing the problems is cool too.

Marii Sernjuk 14
